1. Algebra warm-up

Solve for x:

2x + 3 = 11

x = 4

Quadratic formula:

x = (-b +/- sqrt(b^2 - 4ac)) / 2a

2. Derivatives

Power rule: d/dx x^n = n x^(n-1)

Product rule: (fg)’ = f’g + fg’

Chain rule: (f(g(x)))’ = f’(g(x)) g’(x)

3. Integrals

Integral of x^n dx = x^(n+1)/(n+1) + C

Integral of 1/x dx = ln|x| + C

Fundamental theorem:

Integral from a to b of f’(x) dx = f(b) - f(a)

4. Practice

Try these on the whiteboard (coming soon):

a) d/dx (3x^2 + 5x)

b) Integral of 6x dx

c) Solve x^2 - 5x + 6 = 0

5. Notes

This page is intentionally mostly blank.

Later milestones will let you export your whiteboard notes as a PDF.
